LITTLE ITEMS OF LOCAL INTEREST

FOR SALE—5 head of horses.
Terms Cash. Apply to P. S. Reid,
31-30-22, Three Hills.

P. Edwards, S. F. Torrance, L.
G. McQuade and R. J. Fairbairn
returned Saturday morning after a
five days trip through Northern
Alberta points.

D. F. McKinnon returned on
Thursday after spending the past
few days at Drumheller.

Miss Mae Williams leaves this
week for a month's holidays, the
greater part of which she expects to
spend at the coast.

J. A. Toombs, Jack Dimmer and
Dick Gimbel took in the dance at
Three Hills on Friday evening.

Miss Elizabeth Colvin spent a
few days last week visiting with
Miss Winnie Poxon. She returned
Friday to her home in Drumheller,
accompanied by Miss Poxon.

Mr. and Mrs. G. W. Malton and
family left on Wednesday and will
motor through to the coast where
they expect to spend the next month
or so holidaying.

Hugh MacDonald is working in
the Midland elevator in the absence
of G. W. Malton.

Mr. and Mrs. Willson arrived on
Saturday and are visiting at the
home of their brother and sister-in-
law, Mr. and Mrs. H. Willson.

G. Peters left on Friday to be in
Calgary for the golf play-offs. Dur-
ing his absence Mrs. Peters is re-
lieving in the store.

Fred Poxon has traded in his old
Ford truck to S. J. Garret for a
new Chevrolet truck.

Miss Dorothy McCombe took
sick on Wednesday with the Chick-
en Pox.

Mrs. Alexander left for Calgary
on Monday after spending the past
week visiting with friends in Car-
bon.

Corporal R. H. Purdy is back on

the job again after a holiday spent
at Banff and other points.

J. A. Toombs motored into Cal-
gary on Monday. He was accom-
panied by E. J. Rouleau.

Curtis and Marvin Wiertz spent
the week end at Pine Lake.

Mrs. Braisher and children left
on Thursday and will motor to
Birch River, Man., to spend a
month with Mrs. Braisher's sister
at that point.

J. J. W. Grenier motored to
Carbon on business last Thursday.

J. A. Connolly and Bill Edwards
left on Friday to spend a few days
holidaying at Pine and Sylvan
lakes.

J. A. Toombs was a business vi-
sitor in Swallow on Friday.

Victor and Irene Grenier motor-
ed to Calgary and back on Sunday
last.

Mrs. Casper and two children of
Edmonton, are visiting at the home
of Mr. and Mrs. McNaughton.

Mrs. T. Laing was a Calgary vi-
sitor last week.

Dick Garrett returned to Carbon
on Thursday after spending the
past three weeks with his mother
in Victoria.

Do you know who that sweet
little girl is that I've been dancing
with all evening?
Yes, that's mother.

Motorist: I am exceedingly sorry
I killed your dog, madam. Will
you allow me to replace him?

Miss Oldun: Oh, sir! This is so
sudden.

Girls, when they went out to swim,
Once dressed like mother Hubbard
Now they have a bolder whim,
They dress more like her cupboard.

Clancy—Oh want to buy an oty-
mobile for my wife.

Clerk—Yes, sir. Long body?

Clancy—Begorra, no! She's
built like a barrel. But phat the de-
vil has that got to do wid it.

WHEAT POOL NOTE

The Second Interim Payment
has been mailed to wheat growers
by the Alberta Pool and amounts
to fifteen cents a bushel on all
grades except No. 6 and Feed
Wheat and mixed grains. The pay-
ment on these is ten cents a bu-
shel.

The total payment by the Pool
to date on 1926 deliveries amounts
to \$1.30 per bushel, basis 1 North-
ern in store Vancouver. The final
payment will be made in the fall.

Announcement is also made that
an initial payment of \$1.00 a bu-
shel, basis 1 Northern in store
Vancouver, will be made by the
Alberta Wheat Pool on the new
crop.

The Alberta cheques were placed
in the mail over the week-end. The
distribution of this six and a half
million dollars at this time of the
year will assist the farmers very
considerably with their financing.

THE MOSQUITO

Of all the pests in the world, the
mosquito takes the cake. Go where
you will, the topic turns to the
little insect which has been preying
upon the population for the past
days. People are swatting them
everywhere, in the office, on the
streets and at water resorts. Life
today is just one damn mosquito
after another, with the crop daily
increasing. Can anyone tell us
what the heck the mosquitoes were
ever made for? After going home
after a days work, believing that
you have left them well in the rear,
they crop up in your soup at din-
ner time, buzz over your bed at
night time and sit down on you
without any compunction whatever.
And when they sit down, people
say things that are not altogether
for publication. Ex.

GRADE XI DEPARTMENTAL EXAMINATION RESULTS

The Grade XI examination re-
sults have been announced and the
successful students in the Carbon
school are: Olive Charlebois and
Mary Currie. Hugh MacDonald
and Ella Halstead failed in one sub-
ject, Chemistry. Victor Gordon
failed in Grammar.

The Canadian People

In rounding out the celebration of the Diamond Jubilee of Confederation, the Dominion Parliament at its next session might well take one more step to further promote a united Canadian sentiment and develop a stronger Canadian national spirit by making legislative provision for the recognition of the Canadian race, and to enact that a person born in Canada, whatever their racial descent, shall be designated in the census returns of this Dominion as a "Canadian."

At the present time, tens of thousands of native-born Canadians are made to suffer a feeling of inferiority, not only in their own eyes but before the world, through their inability to record themselves as Canadians. Under the census regulations of the past they have been forced to designate themselves as English, Irish, Scotch, French, Dutch, German, American, — anything but what they really are, Canadians.

As a result, the census statistics of this Dominion advertise to the world that this country of Canada is inhabited by all manner of races and conditions of people, except Canadians. That in all this broad Dominion, a self-governing nation in the British Commonwealth of Nations, with a status equal to that of Great Britain itself, and a full-fledged member of the League of Nations, there is no such person as a Canadian.

If in England the same antiquated and obsolete system of census enumeration prevailed, many families who have lived in England for centuries would be compelled to classify themselves as Dutch, or French, anything but English. His Gracious Majesty the King, the Prince of Wales, and other members of the Royal Family would be recorded as German. In the United States, if our absurd system existed, there would be every known race under the sun, except Americans. It is the un-understandable insistence of the Ottawa authorities in this matter, which is one of the causes of people in other lands failing to understand and appreciate the national and international position of Canada today.

Furthermore, the existing state of things is most unfair to the people of Canada. There are thousands of Canadians whose parents, grandparents, great-grandparents, were born in Canada, and who do not know, and much less care, whether generations back their forebears originally hailed from the British Isles, the continent of Europe, or the isles of the seas. They are Canadians. That is good enough for them, and it ought to be good enough for the Canadian Government.

In some cases a man's great-grandfather may have been Scotch and his great-grandmother French; their son may have married a German; the female offspring of this latter union may have married a Ukrainian born in Canada but one of whose parents was a Hungarian, who in turn had Russian blood. What is the nationality of such a Canadian-born man? He himself does not know, and it is doubtful if the average census enumerator can figure it out. The only point on which the enumerator is clear, and because the Government in its instructions to him makes it absolutely clear, is the man is not a Canadian regardless of the number of these generations of varying racial descent who were born in Canada.

"Canada our Country" was the motto of the Diamond Jubilee celebrations. "Our people Canadians" should be the record disclosed by the census returns, not a conglomerate mixture of peoples. Under the existing system of enumeration it is not at all surprising that so many false statements are being made to the effect that Canada is rapidly becoming a non-English country, and that the foreign-born predominate. If the children of three and four generations of native-born Canadians must still be classified as Russian, or German, or Austrian, anything and everything but Canadian, it is small wonder that people who do not understand our uniquely absurd system are misled and arrive at conclusions the very reverse of true.

Canada's Diamond Jubilee year is a most appropriate time for Parliament to right this injustice to so many of its citizens and to the Dominion as a whole.

To Cross Ocean In Small Boat

Steel Vessel Twelve Feet Long Will
Be Used By Daring Navigator

In a tiny, submarine-like steel vessel of his own construction, built during his spare time, William Oldham, of Warrington, Lancashire, proposes to set out shortly on an adventurous

voyage from Dover to New York. The boat, which is only 12 feet long, with a beam of 3 feet, will be propelled by a navigator with a pedal mechanism much like bicycles operating the two-bladed propeller.

A "windmill" geared to the shaft will relieve him when the wind is fair. Two persons can be accommodated, although there won't be full length sleeping quarters. There are six water-tight compartments and four gunmetal windows. Oldham will be able to button himself down when the weather is bad and keep a lookout from a small "conning tower." He has estimated that the trip will occupy 19 days, and he is desirous of finding some one to share the hazards with him.

Insulin Capsules Made

Insulin may now be taken in capsules, according to investigators at the University at Breslau, Germany, who claim to have found a substitute for the pancreatic insulin. Heretofore the remedy for diabetes could not be given in the form of drops, powders or tablets, but must be injected under the skin. Prof. J. C. Minkowski, who conducted the method of giving insulin has been effective in a number of cases.

By a new device an approaching train completes a circuit and thus swings a crossing light into a commanding position, rings a bell and displays a danger flag.

Quick Stop for Airplanes

New Device Will Permit Planes to
Land on Roofs of Buildings

Airplanes can now be safely brought to a stop within a distance twice their own length under a reversing propeller arrangement patented by C. Francis Jenkins, noted Washington inventor.

The propeller cannot be operated until the plane lands, Jenkins explained, and when thrown in reverse halts the airplane with the ease of powerful brakes.

The inventor believes his device will permit air fields for mail and commerce to be established on the roofs of buildings, eliminating the slower and costly hauling of mail, express and passengers from suburban fields.

Sour Stomach Risings Subdued by "Nerviline"

A Few Drops Bring Relief

The wonderful relieve you get from twenty drops of Nerviline will surprise you. Take it in sweetened water, and almost immediately you feel better. Nerviline brings up the gas caused by fermenting food, and relieves that distressed feeling in the stomach. When colic or cramps strike you at night, Nerviline is a sure relief. For general use in the family, for emergent ills, always keep trusty Nerviline on hand. 35c. at all dealers.

Mapping Canada From the Air

Since 1921 when aerial photographic surveys were begun by the Topographical Survey of the Department of the Interior, 25,630 square miles in Canada have been covered by vertical photographs and 127,740 square miles by oblique aerial photographs.

DEBILITY DUE TO INDIGESTION

Perfect Digestion Comes Through
Rich, Red Blood

There can be no perfect digestion unless you have rich, red blood. This is scientifically true. It is also true that there is no tonic for the stomach that is not a tonic for every other part of the body. The way, then, to tone up the stomach is to tone up the blood.

The many so-called stomach remedies merely try to digest your food for you. How much better it is to tone up the stomach so that it will do its own work as nature intended. There is no pleasure in eating pre-digested food. Tone up your stomach and your appetite and digestion will soon be normal.

If your digestion is weak and your blood thin you need the help of Dr. Williams' Pink Pills to enrich the blood and restore strength. In addition use care in the selection of your food and your stomach trouble will soon pass away. Mr. Gordon Dundas, Peterboro, Ont., tells us follows what this medicine did for him. He says: "Something over a year ago I was a gasoline salesman when I was taken sick. I felt very miserable and lost twelve pounds in weight. I did not sleep well and could not eat as I could scarcely retain anything in my stomach. I went to a local doctor who told me the fumes of the gas had got into my system. He gave me some medicine and told me I had better go to the country for a change of air. I did so, but I still felt listless and groggy, and had no ambition. On the advice of a friend I decided to try Dr. Williams' Pink Pills. I had not been taking the pills long before I was beginning to rest better, and to eat fairly well. I kept on taking the pills until at the end of the seventh box I knew I did not need any more, as I had gained the weight I had lost, slept well and could eat anything. I have since had splendid health and cannot say too much in praise of Dr. Williams' Pink Pills.

You can get these Pills from any medicine dealer or by mail at 50 cts. a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Teacher: "For men must work and women must weep." What is the meaning of that line, Tommy?"

Tommy: "It means that men have to work to get money, and then the women have to cry before the men will divide it with them."

Farmers Market Tour

An Exceptional Opportunity for Farmers
of Western Canada to
Visit the Old Land

The British market must ever remain the most desirable outlet for Canadian farm products. As a result of keen competition from other countries, it is vital that the Canadian farmer should become familiar with what this market desires. As very few agriculturally trained observers from this country have had this privilege, many would welcome the opportunity of making an intimate study of marketing conditions at first hand. There has therefore been organized a "Farmers' Marketing Tour" by the Department of Agriculture of the Canadian National Railways. This tour, which will be open to any Canadian farmer, will be of some seven weeks duration, leaving Halifax January 8, next, with a full month spent in the old land, during which important marketing centres in England and Scotland, and some of the farms where famous breeds of livestock have been developed, will be visited, with a side trip to Denmark for a study of co-operative marketing in land of its birth.

The tour originated by Dr. W. J. Black, director of colonization, agriculture and natural resources, on the Canadian National Railways is being planned to provide the maximum of educational value, combined with all the pleasures of the ordinary sight-seeing tour. The study of conditions abroad by a large group of observers from the farms in Canada should have its practical results in the successful application of the knowledge gained on such a tour to the general improvement of the agricultural industry in Canada.

The tour is essentially for the Canadian farmer. Any farmer anywhere in Canada, or anyone vitally interested in agriculture and marketing problems, and in the development of wider markets for Canadian products, may join the tour, and it will also be possible for women who are interested in any phase of agriculture to go.

The cost of the tour from the time of leaving Halifax, Canada, until the return to that port will be \$590.00. This cost includes all ocean fares and meals, railway and bus fares in the old land, accommodation at good medium-class hotels, meals and ordinary costs incidental to the tour while overseas.

In addition, members of the party will pay the railway fare and cost of travel to and from the port of sailing at special rates provided, and will be required to bear passport costs, Government tax on steamship ticket, tips on board ship crossing the Atlantic, and personal expenses such as laundry, etc., and any additional expense of entertainment incurred by themselves.

Ocean accommodation is being provided by the White Star Line, Canadian Service. The party will sail on the steamship "Devonian" on Sunday, January 8th, the accommodation for the party being tourist class with run of ship. The return voyage will be made on the steamship "Albion," sailing from Glasgow on February 19th, the accommodation for the party on this ship being tourist class. The accommodation and service on these well-known steamships is excellent and the party is assured of a pleasant and comfortable voyage. Members of the party wishing to remain longer in the old land may arrange for similar accommodation on any later ship through the White Star Line offices overseas.

Further information may be secured about the Farmers' Marketing Tour by communication with W. J. Black, Director of Colonization, Agriculture and Natural Resources, Canadian National Railways in Canada.

Minard's Liniment for insect bites.

Alberta Fur Production

Official figures show that Alberta's total fur production for the fiscal year 1925-26 was valued at \$2,122,778.00. This represents a gain of \$90,000.00 over the preceding year, and puts Alberta in third place among the provinces in the value of furs produced.

A London school started primarily to teach languages, now finds most of its pupils among American tourists who are anxious to acquire an English accent within a short time. A close second in popularity is a course in "curing" accents.

Canada's gross agricultural wealth is nearly eight billions, increasing nearly three-quarters of a billion in three years.

The way to see the virtues of a trust is to become a stockholder.

Gum-Dipping A Firestone Contribution to Economical Travel

The greatest enemy to tire life is not the chopped-up road, the broken pavement or the harsh grind of rough city streets—but heat, which is created by internal friction. Heat not only weakens the fabric, but also softens the rubber and causes blowouts and tire failures.

Firestone chemists and engineers knew that if they could find a way to eliminate this destructive heat and internal friction, the mileage-giving qualities of tires would be greatly increased. Such a method was found and called "Gum-Dipping."

The Gum-Dipping process is one of Firestone's contributions to economical travel in insulates and impregnates every fiber of every cord with rubber, reducing internal friction and at the same time binding the cords together by a stronger union of rubber, thus giving greater strength and flexibility to the tire.

Firestone dealers everywhere—familiar with Gum-Dipping and its advantages—will gladly explain how thousands of extra miles are built into Firestone tires by this exclusive method. Take advantage of the Gum-Dipping process to lower your tire costs this year.

Russia Preparing For War

Military Sports Advocated to Awaken
Enthusiasm of Youth of Country

A campaign is on foot throughout the Soviet Union for the promotion of military preparedness in the face of recent developments, which are regarded as threats of war. The period from July 10 to July 17 was designated as "defense week," toward the success of which all efforts were directed.

Military sports are being strongly advocated as a means to awaken the enthusiasm of the youth of the country and the heads of the unions are exhorting their members to rally around "Osovsivskiet," Russia's greatest voluntary martial organization. The latter is headed by Alexis Likhoff and War Commissar Voroshiloff, and its members are said to number millions.

The Family Physician: The good doctor is always worth his fee. But it is not always possible to get a doctor just when you want him. In such cases, common sense suggests the use of reliable home remedies, such as Dr. Thomas' Electric Oil, which is wonderfully effective in easing inflammatory pains and healing cuts, scratches, bruises and sprains. The presence of this remedy in the family medicine chest saves many a fee.

Science has gone far, but the stairs still creak under the softest pressure at 2.39 a.m.

Minard's Liniment for carache.

Oysters and clams contain about 100 times as much iodine as beef steak.

CHOLERA, CRAMPS, PAINS IN THE STOMACH RELIEVED BY

Mrs. D. Leavitt, Back Bay, N.B., writes: "Last summer my children were very ill with cholera and suffered severely from cramps and pains in their stomachs. I tried several remedies, but nothing seemed to do them any good. A friend of mine told me to try Dr. Fowler's Extract of Wild Strawberry. I got a bottle and gave them a few doses and they soon found relief. Now I will never be without it in the summer months."

Don't Accept a Substitute

This preparation has been on the market for 80 years; put up only by The T. M. M. Co., Limited, Toronto, Ont.

FACE LOOKED TERRIBLE

Pimples Were Awfully
Painful. Cuticura Heals.

"A small pimple appeared on my chin and I scratched it causing more to come. The pimples were hard and sore and I used to keep scratching. They festered and were awful painful, and my face looked terrible. I was discouraged because when I went out it seemed as if everyone was looking at me."

I began using Cuticura Soap and Ointment and in a week's time I could see they were helping me. I continued using them for a month and the pimples disappeared. I was healed." (Signed) Mrs. Harry Heffel, Borden, P. E. I., Nov. 19, 1926.

For every purpose of the toilet and bath, Cuticura Soap, Ointment and Talcum are excellent.

Sample each free by mail. Address Canadian Union, 1500 St. Louis, Montreal. Price, Soap 5c. Ointment 25c. and 50c. Talcum 10c.

CHAPTER IV—Continued

Any neighbor would tell you that Dr. St. John had built this house when he got married, and if you had time to wait you might hear that the doctor would not have an office in his house because his young wife was not strong and the overflow of human misery from a doctor's office, even the coming and going, would be depressing to her. So the doctor had an office down town, where visiting patients sat in wicker chairs reading the selected magazines on the wicker table while they waited.

The doctor's wife had her own car, plenty of money, and all the time the day or night holds.

When Helmi had been with Miss Abbie three months the doctor came one day to call. It was not a professional call. Indeed, he, who advised in so many cases, now came looking for advice. He and Miss Abbie had known each other in Cannington, where they had lived on the same street, went to the same Epworth League, and were taught in the same stone school-house on the hill.

The doctor sat in Miss Abbie's golden oak rocker and stated his case. "You have a young Finn girl with you, Abbie," he said.

Miss Abbie nodded; there was no denying it. At that moment Helmi was scrubbing the back verandah and singing at the top of her voice a song of her own country.

"She's a bright girl," continued the doctor, "and attractive." Miss Abbie smiled and nodded again. "But needs more teaching in English. You send her to night-school, do you? Yes, well, here's my point. My wife needs more interest in life; she gets low spirited and upset, though I cannot find the cause. I think if you would ask her she might consider teaching your girl for an hour every second day or so. She admires the girl; indeed, made a sketch of her the day she dug your garden."

"She would do it," said Miss Abbie, apologetically. "I cannot keep work ahead of her. She wanted me to let her take in washing, at least enough to keep her busy, one morning. She does ours in such a little time, and she tells me she loves it. I wanted to hire a man to dig the garden but she coaxed me so that I gave in."

The doctor's face was wistful. "Don't spoil her, Abbie, let her work, work and salvation are closely related."

Across the street the perfect bungalow dozed in the bright sunshine. Its windows sparkled, its flowers turned their faces to the sun. It looked like an abode of happiness and contentment.

The doctor's wife came down the steps in a long silk motor coat and

veil. She had heard a horn pealing a signal and went around to the side of the house, where a closed car was slowing down. A man sprang out lightly and opened the door for her.

"She needs something, Abbie," the doctor said sadly. "I don't know women very well. Women are queer now, Abbie, they are so restless and discontented. I believe the women who had to sew and knit and work early and late were happier. Women of this day, having little to do, do nothing. I fear I am a dull old stick for Eva. She is fifteen years younger than I am, and I'm afraid it is too much."

Miss Abbie's lack of matrimonial experience kept her dumb, but she knew her old friend was suffering, and her face spoke her sympathy.

"Eva is the kindest hearted kid in the world, and she would love to help anyone," went on the doctor. "Will you come over tomorrow—she's out now—and ask her."

The first day Helmi went across the road for her lesson she spent an unusual time over her toilet. Her face shone from soap and water, her hair was tortured into crocheted curls, and as a final preparation she tightened her corsets until breathing became difficult. She had noticed the extreme slowness of the dainty person who went in and out of the doctor's house, and had grown critical of her own ample form.

The doctor's wife received her in the sun-room, whose magnificence completely overpowered Helmi. The sun came in through curtains of yellow silk, falling in pools of light on the green and white tiled floor. The tables were of wicker, with pockets of silk from which gaily covered books and magazines protruded. A black dish had gorgeous birds perched on its rim, apparently just going to shake their thirst from the water below, on whose surface wax water-lilies floated. Ferns with trailing fronds of green lace hung from the low ceiling, and birds in gold cages turned the air into a musical jingle.

Helmi stood at the door transfixed with the beauty of it all.

"Come in, pretty thing," sang the doctor's wife in a chanting voice. She was lying on a chintz-covered lounge with a box of chocolates on a low stand beside her. "Come in and let me look at you."

Though Helmi did not know the words, she knew she was being made welcome. She glided in with the peculiar walk she had when she was frightened, arriving as noiselessly at the couch as if she had come on runners.

"Creamy skin, green brown eyes and fiery gold hair—you should do well in this land of opportunity."

"Yes, Ma'am," agreed Helmi.

"No, don't say that," Mrs. St. John was sitting up now, making a pretty picture with her flushed cheeks and rumpled hair. "Say, 'Yes, Mrs. St. John.' 'Yes, Ma'am' is gone forever with the hair-wreaths and petticoats and lots of other things I could mention. Say 'Yes, Mrs. St. John.'"

Helmi repeated the words correctly. The lesson lasted an hour, coinciding exactly with the duration of the chocolates, and Helmi was invited to come every Tuesday.

To Helmi there seemed to open a new world, rapturous, rainbow hued and golden—something she had dreamed about. The subtle perfume of the sun-room, the air of indolence and luxury, of freedom from care or responsibility, the muffled sounds in the house, as if every one walked on carpets of plush—all this seemed a part of her dream.

When she came out into the sunshine and ran across the road Helmi, for the first time, was able to think in English, and the words that she said were, "Some class."

CHAPTER V.

Young Methodist Church, though not set on a hill, was determined that it would not be hidden in spite of that geographical handicap, and so resorted to the wholly worldly but nevertheless effective method of advertising. A black and gold signboard on the corner of Broadway and Balmoral acquainted the wayfarer with several facts in the hope of interest-

WILSON'S

Will kill many times more flies for the money than any other fly killer. Each pad will kill flies all day, every day, for three weeks. At all Grocers, Drug-gists and General Stores—10c and 25c per package.

ing that fickle person in his own welfare. It told the name of the pastor, the subject of his sermon, the name of the choir-leader, the soloist for next Sunday, the deaconess, the president of the Ladies' Aid Society, and in larger and still more golden type it proclaimed that this was the Strangers' Church. The stranger naturally looked around in an endeavor to locate his property, and if he would follow the indication of the gold hand which pointed up Broadway he would find it, sure enough. There it stood, solidly brick, an abbreviated tower and empty belfry, deep set windows, a few straggling vines holding to a network of wire that swayed in the winds and kept the vines in constant remembrance of the uncertainty of life!

Over the side door one evening, though it was yet early, a light burned, pale amber and faint because of the daylight. At first it looked as if the sexton had forgotten to put it out from the night before, but members, adherents and frequenters knew that it had a meaning. It simply meant that something was in progress—the house was in session. The sexton, a burdened man, with a lame leg and a short temper, who was rarely seen without a duster in his hand, was arranging and dusting the seats in the Tower Room. The Girl's Club was holding a supper meeting.

(To Be Continued.)

Millions of "Dead" Letters

Yearly Report Shows Necessity of Being Careful About Address

It will come as a surprise to most people, and as a shock to many, to learn from the Canadian Post Office Department that nearly 2,000,000 "dead" letters were handled by this department during last year. More than 1,000 of these letters were registered—and had a monetary value amounting to thousands of dollars. In fact, the sum of \$19,150 was recovered by Postal authorities from this large quantity of undelivered mail. The number of such letters is far too great. While it will never be possible, perhaps, to completely eliminate all "dead" letters, they could be reduced to a negligible number through a little carefulness by the writers.

It is sheer carelessness on the part of the writer in addressing the envelope that is the primary reason for the majority of the 2,000,000 "dead" letters. What a world of tragedy may lie behind this huge quantity of undelivered mail. Think of it. Two million persons in the world wondering why two million others "never replied to the letter I wrote." Hopes may have been blighted, hearts broken, fortunes lost. Who can tell how many tender outpourings of feminine hearts have been revealed to ruthless official searching in "dead" letters for a return address. The moral is clear; Make sure the address on all letters is correct, and heed the admonition of the Post Office Department to write a return address on the outside of all envelopes, you will be doing the official a good turn and, incidentally, yourself.

Has Stringless Violin

Canon F. W. Gilpin rector of the parish of Faulkbourne, England, has a hobby—unique musical instruments. He has about 600 specimens from all corners of the earth. Oddest of all, perhaps, is a stringless violin. Another surprising musical instrument is what appears to be a large family Bible; when opened it shows a keyboard and a small set of pipes. On this organ the canon has played at mission services.

An enamel for wood and metal has been made from a solution developed from cotton, which is hard, durable and waterproof.

Canada's New Carillon

Is Considered Finest and Most Complete Ever Constructed

Canada's splendid new carillon, installed in the Memorial Tower of the Parliament Buildings in Ottawa, seems to have met the highest anticipations of the Government and added another laurel leaf to the crown earned by the famous foundry at Croydon, England. Both the thousands who heard the bells peal forth their joyous message at noon of Jubilee Day, and the millions to whom it came by radio throughout the length and breadth of the Dominion, were enthralled by the rich quality of the sound and amazed at the ability of the bells to reproduce every kind of music. This had been demonstrated in England at the recital given by M. Lefevre, the distinguished Belgian carillonneur, at the foundry. An account printed at the time stated that no less than 1,200 people visited the Croydon works to see the Canadian carillon, described as the finest and most complete ever constructed in the home of bell-ringing.

Ottawa has indeed been favored in becoming the possessor of a carillon unrivalled at the present time, and that will remain a perennial fountain of joy and inspiration to the people of today and to generations yet unborn. In England it was generally admitted that this latest production of a craftsmanship unequalled by any other country of the world is an instrument of great majesty and beauty. The carillon is, indeed, the greatest in the world, ranging from a ten-ton Bourdon, tuned as closely as possible to that of Big Ben at Westminster, to a treble only twelve pounds in weight, 53 separate bells in all. The demonstration in England revealed its ability to reproduce all kinds of music, classical and popular.—St. Thomas Times Journal.

Puddings For Desert

Two Recipes That Have Been Found Unusually Delicious

There is one thing in favor of puddings for dessert that makes the dish a frequent selection, and that is that the average simple pudding can be used for the little ones as well as the adult members of the family. Here are two recipes that have been found unusually delicious and yet are simple to prepare and economical:

Orange Bread Pudding

$\frac{3}{4}$ cup Eagle Brand Condensed Milk.
2 cups hot water.
1 cup sifted soft bread crumbs.
2 egg yolks, slightly beaten.
1 tablespoon melted butter.
Juice of three oranges.
Grated rind of one orange.
 $\frac{1}{4}$ teaspoon salt.

Add hot water to condensed milk, blend thoroughly, and bring to scalding point. Pour over bread crumbs; let stand until cool. Add egg yolks, salt, melted butter, orange juice and rind. Pour into a buttered pudding dish, set in a pan of hot water. Bake in a moderate oven about forty-five minutes. Cover with meringue of stiffly beaten egg whites and one-fourth cup sugar. Brown slightly in a moderate oven. Serve cold. If desired, the whole eggs may be added to pudding, the meringue omitted and the pudding served cold with cream.

Tapioca Cream Pudding

$\frac{3}{4}$ cup Eagle Brand Condensed Milk.
2 $\frac{1}{2}$ cups hot water.
4 tablespoons quick cooking tapioca.
 $\frac{1}{4}$ teaspoon salt.
2 eggs beaten separately.
1 tablespoon melted butter.
1 tablespoon vanilla or any preferred flavoring.

Dilute milk with hot water, blending well. Bring to scalding point in a double boiler. Stir in tapioca and cook about one-half hour. Add butter and salt to egg yolks. Pour over them gradually the hot tapioca, stirring constantly. Return to double boiler and cook three minutes longer. Pour slowly over the beaten egg whites, folding in gently; flavor and chill. Serve plain or with cream or fresh fruit sauce.

Vary cream tapioca pudding by arranging fresh or canned peaches, apricots, or sliced oranges in bottom of serving dish, pouring over the chilled tapioca cream.

Estevan Briquetting Plant

Five units of the Estevan Briquetting Plant turning out 750,000 tons of fuel annually is the objective of the new company which has taken over operations at Estevan, according to G. F. Sheehan, of Seattle, inventor of the process now being installed. One unit, turning out 20 tons an hour, for 24 hours of the day, will be in operation by December 1st, he said. E. A. Hartley, of Seattle, is president of the new company.

CONDENSED MILK

Little Helps For This Week

He that contemneth small things shall fail by little and little.—Eccles. xix. 1.

Despise not little sins;
The gallant ship may sink
Though only drop by drop
The watery tide it drink.
—Richard Chenevix Trench

The sins by which God's spirit is ordinarily grieved are the sins of small things,—laxities in keeping the temper, slight neglect of duty, lightness, sharpness of dealing. If it is your habit to walk with God in the humblest occupations of your day, it is very nearly certain that you will be filled with the Spirit always.
—Horace Bushnell.

NO BETTER MEDICINE FOR LITTLE ONES

Is What Thousands of Mothers Say of Baby's Own Tablets

A medicine for the baby or growing child—one that the mother can feel assured is absolutely safe as well as efficient—is found in Baby's Own Tablets. The Tablets are praised by thousands of mothers throughout the country. These mothers have found by actual experience that there is no other medicine for little ones to equal them. Once a mother has used them for her children she will use nothing else. Concerning them Mrs. Charles Hult, Tanook Island, N.S., writes: "I have ten children, the baby being just six months old. I have used Baby's Own Tablets for them for the past twenty years and can truthfully say that I know of no better medicine for little ones. I always keep a box of the Tablets in the house and would advise all other mothers to do so."

Baby's Own Tablets are sold by all medicine dealers or will be mailed upon receipt of price, 25 cents per box, by The Dr. Williams' Medicine Co., Brockville, Ont.

A block of coal nine feet high and four feet square was recently shipped to Italy.

No child should be allowed to suffer an hour from worms when prompt relief can be got in a simple but strong remedy.—Mother Graves' Worm Exterminator.

Canada has 50 million poultry, with an annual production value of \$50,000,000.

Keep Minard's Liniment near at hand.

Colors of every tone and shade, numbering 1100, compiled from productions of dye makers, are displayed in an index recently issued.

UNIVERSITY OF MANITOBA WINNIPEG

Offers, among others, the following Courses:

Through its FACULTY OF ARTS AND SCIENCE courses leading to the degrees of B.A. and M.A., and B.Sc., including B.Sc. (Phar.), and M.Sc. Through its FACULTY OF ENGINEERING AND ARCHITECTURE courses leading to the degrees of B.Sc. (C.E.), B.Sc. (E.E.), M.Sc., and B.Arch.

Through its FACULTY OF MEDICINE courses leading to the degrees of M.D. and D.M. Through its FACULTY OF AGRICULTURE AND HOME ECONOMICS courses leading to the degrees of B.S.A. and B.Sc. (H.E.). Through MANITOBA LAW SCHOOL, an affiliated institution, a course leading to the degree of LL.B. For terms of admission, details of courses and other information, apply to

A number of the people of Car-
bon and district are feeling quite
blue over the hail situation in this
district and the fact that business
in general will be at a standstill
this fall without the bumper crop,
which everyone was looking for-
ward to with eagerness. The hail
did considerable damage in this
vicinity, we agree, but most of the
farmers carried insurance. If they
were only hailed 10 or 15 per cent.
they get insurance and with another
month to recuperate, the grain
will be all right to thresh. The
yield will not be as great as other-
wise, but if the grade is good there
will be a fair profit for the farmers.
Take the loss now with a light
heart and when harvesting starts
about a month or so from this date
many of you will have forgotten
that there ever was any damage
done in this district to mar the
prospects of a glorious future.

Yes, Sir, I've worked for the
same boss going on 20 years.

I can beat that. Next week is our
silver wedding.

Other experts claim the honey-
moon is over when the bridegroom
starts pasting bathing girls on the
windshield the day after the wed-
ding.

Woodpeckers' Convention at Banff

Typical Woodpecker hole in a Fir tree. (Insert) Rare photograph of the
Dileated Woodpecker.

In one of his lectures delivered at the
Banff Springs Hotel, Dan Mc-
Cowan, the well-known Canadian
naturalist, tells a wonderfully inter-
esting story concerning a wild bird
convention held in the Canadian
Pacific Rockies during the fall of 1926.
At that time the new Banff Springs
Hotel was under construction and
large numbers of structural steel
workers were engaged in uprearing
the fabric around which a dream
palace had been evolved. There was
the loud clanging of steel as the heavy
girders were lifted and guided into
place. Winches rattled and engines
hissed incessantly. Above all other
sounds rose the staccato "rat-tat-
tat" of scores of riveting hammers.
Far up the Forty Mile Valley of the
Bow this sound was borne; it re-
echoed from cliff and crag on grey
Mount Rundle, it shattered the
silence in the deep green woods that
clothe the valleys and the mountain
slopes.

Throughout this extensive forested
area around Banff and Lake Louise,
many woodpeckers are to be found at
all seasons of the year. To these
feathered foresters came the sound
of the riveters at work; it was inter-
preted by them as the noise of a host
of tree boring birds, hammering and
drilling in the bark and timber of

Douglas Fir and Spruce. Instinctively
they hastened to the source of the
sound, confident that a keen-eyed and
enterprising member of the tribe had
discovered an army of tree-infesting
grubs and that there would be a feast
for all who cared to answer the sum-
mons broadcasted so clearly.

The Dileated Woodpecker, a large
black plumaged bird with crest of
scarlet, vivid as huntsman's coat,
flew through the woods like a fiery
torch and caused the dim aisles to
echo with his loud and raucous cry.
Downy and Hairy Woodpeckers,
lesser birds in the ancient order of
foresters, clung to the gnarled bark
of trees and with heads aslant,
hearkened querulously to this strange
drumming of hammers on steel.

Such an assemblage of Woodpeckers
had never before been seen in the
valley of the Bow. The woods seemed
alive with birds of this breed. Unlike
most conventions held at Banff, this
one could hardly be termed a success.
No doubt the birds were disillusioned
and deeply disappointed that the
promised fast did not materialize.
Nevertheless there must have been
compensation in the number of
family re-unions made possible by the
call of the hammers that fashioned
the framework of a great castle in the
scenic heart of the Rockies.

HORSESHOEING :: ACETYLENE WELDING :: REPAIRING

Built for
Endurance

BEHIND the beauty of Chevrolet there is
an abundance of strength and stamina,
not as there is a great store of surplus power.
The rugged channel steel frame, the husky
banjo-type rear axle, the powerful valve-in-
head engine and every detail of construction
combine to defy the ravages of wear and
tear, of hills and ruts, of mud and sand, of
extremes of climate and of hard, continuous
usage.
As Chevrolet has been designed for beauty,
powered for performance, planned for
economy—so Chevrolet has been BUILT
FOR ENDURANCE.
And this—the most Beautiful, the most
Powerful and the most Rugged Chevrolet in

Chevrolet History—is selling at new, low
prices, the lowest for which Chevrolet has
ever been sold in Canada.
